THE ART OF
Comfortable Sleep.

#Comfort / #TemperatureManagement / #CoolFusion

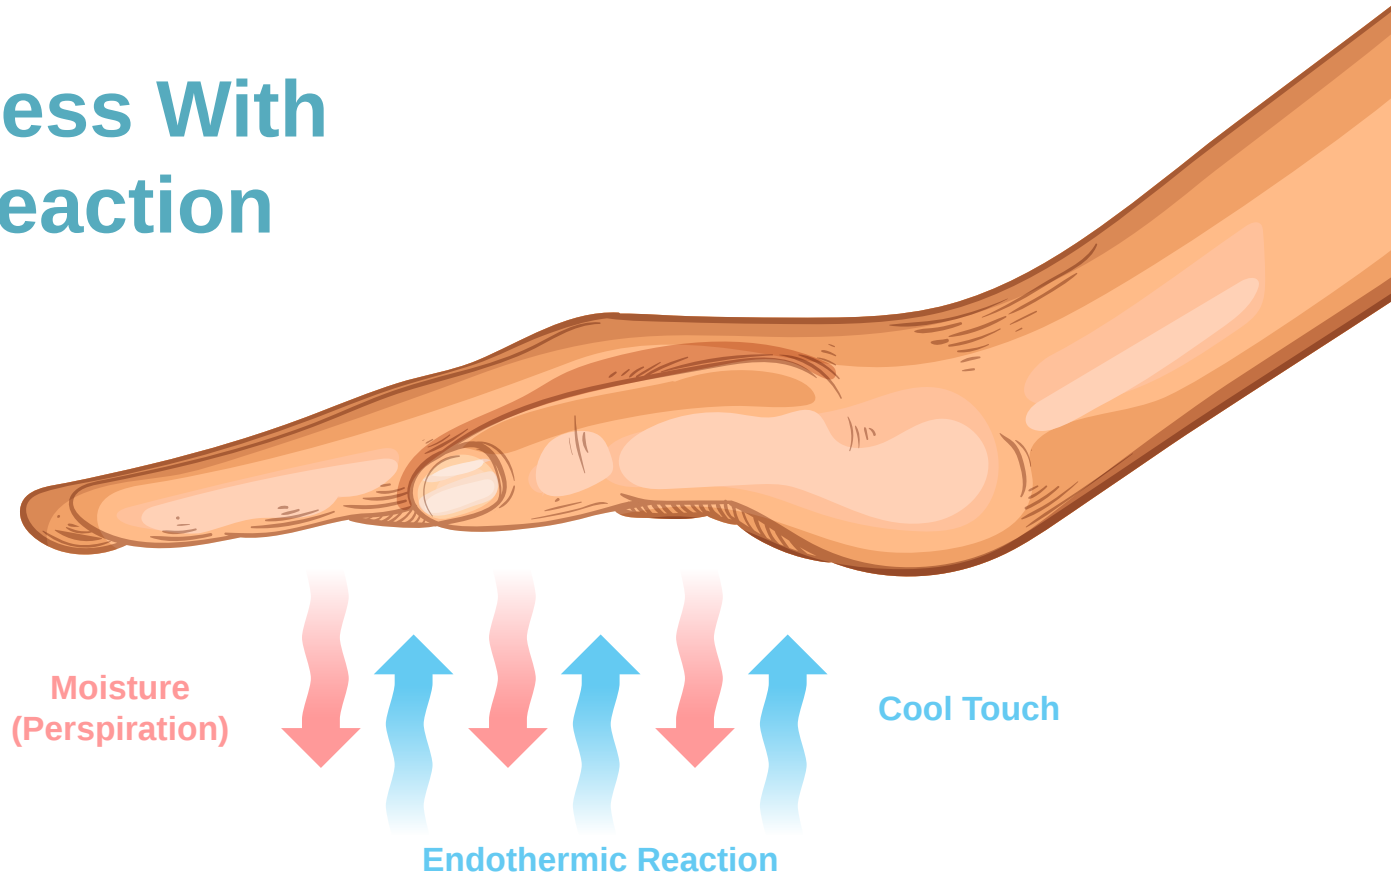

ketsmattressticking.com

Working Principle?

- Thanks to the special chemicals used in its production, the fabric surface feels cool.
- The chemicals used are obtained by natural methods. When combined with moisture, it provides a cooling effect by showing an endothermic reaction.
- The chemicals used in its production are products that are suitable for human health and have been approved by the FDA.

A Feeling of Coolness With An Endothermic Reaction

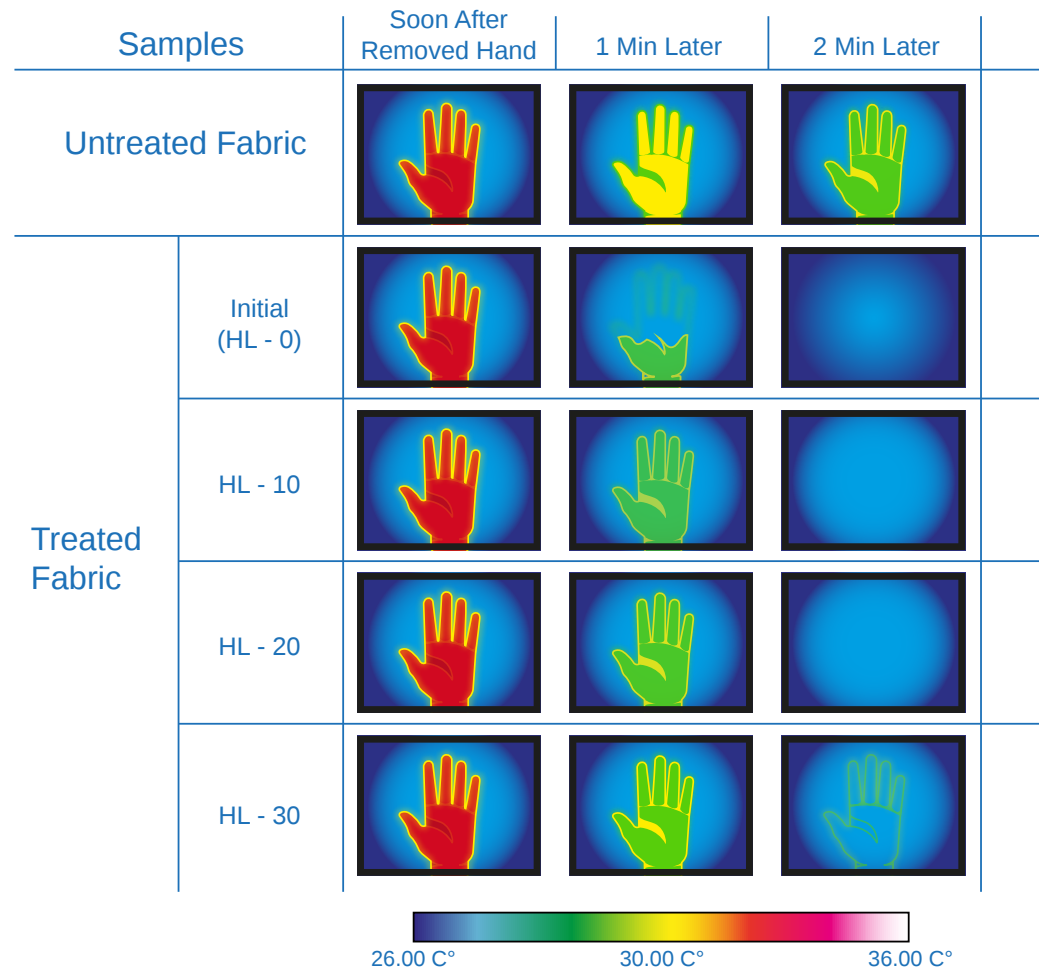

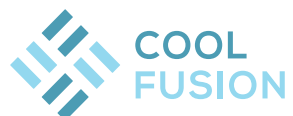

Features of Cool Fusion Mattress Fabric?

- It creates a feeling of coldness by giving an endothermic reaction in case of sweating and in contact with the skin, which can be applied on all types of fibers.
- Thanks to its special structure, it retains its effect for a long time.
- It provides a unique sleeping experience by giving a feeling of coldness, especially in hot countries.
- It improves the quality of sleep thanks to its high air permeability.

Cool Fusion Test Results

- A hand is held on the Cool Fusion fabric for 3 minutes and a thermographic image is taken as soon as it is pulled out, after 1 minute and after 2 minutes.

A decorative pattern of light blue hexagons and lines, arranged in a grid-like structure, occupies the left side of the image.
