What is FiberSmooth?

FiberSmooth is an innovative softener solution designed for the most demanding fibre types. It has been specially developed to optimise the treatment of fabrics with blended content, especially in bedding fabrics. FiberSmooth delivers excellent results by increasing the softness, durability and usability of your bedding fabrics.

Features

High Performance: FiberSmooth provides superior softening performance in all types of bedding fabrics. It eliminates unwanted stiffness while preserving the natural properties of your fabric.

Various Applications: It offers a wide range of applications in different fibre types such as PAN, CO and their blends. It adapts to various fibre types with a single product.

Durability Enhancer: Increases the durability and longevity of the fibre, making your products usable for longer.

Advantages

Innovative Formula: The special formula of FibreSmooth penetrates deep into the fibre texture and ensures a long-lasting effect.

Product Diversity: A versatile product optimised for different fibre types and blends.

Easy Application: FiberSmooth can be applied easily, allowing you to get fast results.

Performance Characterisation

1. Degree of Softness: FiberSmooth mattress fabrics have a pronounced softness characteristi
2. Durability Tests: FiberSmooth mattress fabrics are more resistant to washing and abrasion tests.
3. Fibre Structure: Microscopic examination shows that FiberSmooth penetrates the structure of the fibre, providing a homogeneous softening.
