QUICKDRYTEX Technology

Quickdrytex is an advanced dynamic drying technology that rapidly wicks perspiration from the skin and transfers moisture to the mattress ticking fabric's surface, for evaporation, leaving the user comfortable and dry.

Available for polyester & its blends with constant direct skin contact.

Features of QuickDryTex Mattress Ticking Fabric?

Textiles treated with Quickdrytex enhances user comfort, complements the skin's natural moisture transportation system and controls thermal cooling.

Quickdrytex mattress ticking fabric reduces static cling during sleeping and also impart soil release properties.

Advantages

- Dynamic drying,
- Long-lasting performance,
- Safe for skin and environment,
- Enhanced user comfort,
- Excellent anti-static properties,
- Enhanced soil-release properties,
- Superior feel,
- Reduced chafing
