What Is Micro Capsule Technology?

Microcapsule technology is a method used to impart special properties and functionality to textile products by integrating small microscopic capsules. These capsules can often contain active ingredients, flavour, colour or other substances. When micro capsules are applied to the textile surface or added to yarns, they can release their effects over time. The properties of the Lavender flower are numerous and well-known since ancient times. The essence obtained by distillation of the flowers is anti-septic, analgesic and antiinflammatory. It's also used for its relaxing, calmative, sedative and lenitive quality.

Why Lavender Flavoured Skin Care With Micro Capsule Technology?

- The calming effect of lavender relieves stress and gives peace of mind.
- Microcapsule technology delivers the effect of lavender extracts to your skin continuously throughout the night.
- It offers dermatologically tested, safe and effective care.
- While nourishing your skin throughout the night, it soothes your soul.

Features

- **In-depth Skin Care with Microcapsule Technology:** Microcapsule technology traps lavender extracts in microscopic capsules, providing continuous and in-depth care for your skin overnight.
- **Intensive Moisturising:** Microcapsules loaded with lavender essence instantly moisturise your skin, relieve discomfort caused by dryness and smooth your skin.
- **Renewing Effect:** Microcapsule technology supports the skin's natural regeneration processes, strengthens skin cells and provides a vibrant appearance.
- **Soothing Lavender Aroma:** The special lavender aroma in our products offers a calming and relaxing effect throughout the night and supports mental and emotional balance.

Benefits

- **Long Lasting Effect:** Micro-capsule technology preserves the effect of active ingredients for a long time, caring for your skin throughout the night.
- **Relaxing Care:** Lavender aroma turns your beauty routine into a relaxing experience, relieves the tiredness of the day and rests your mind.
- **Fast Absorption:** Our products are quickly absorbed and do not leave an oily feeling, leaving your skin feeling light and fresh.
- **Overnight Care:** Bed face skin care nourishes and renews your skin during night sleep, allowing you to wake up with a refreshed skin in the morning.
